

# AZURE RED HAT OPENSIFT (ARO) ACCELERATOR ENTERPRISE STRATEGY AND IMPLEMENTATION

Accelerate adoption of your container strategy using ARO. This comprehensive, consultant-led, turnkey solution will enable the conception, automation, and implementation of an **enterprise-grade container solution with ARO**. Save months of learnings, trial and error, and costly false starts while implementing a complete solution empowering your teams to take advantage of an advanced and proven container strategy.

InCycle's ARO Enterprise Accelerator solution provides **key components required for a successful container strategy implementation**. Every component is designed to accelerate adoption, standardization and governance. The packaged service eases infrastructure maintenance through automation, empowers teams via self-service, and streamlines implementation through state-of-the-art guidance and a proven roadmap.

## TURNKEY SOLUTION

### SAVE MONTHS!

Using a container is easy. Developing and implementing an enterprise container strategy is complex and difficult. Save time, effort and money by implementing a production-ready solution.

### END-TO-END SOLUTION

An enterprise-grade solution is more than deploying an ARO cluster. You need proven, robust practices and built-in governance to realize a reliable, scalable and easy to manage Kubernetes experience.

### EMPOWER YOUR TEAMS

Automation is key to standardization and predictability — empowering your teams to take complete advantage of a containerized infrastructure.

### ADAPTABLE

A proven and adaptable plan is paramount for a contextual and smooth implementation. Our expert consultants tailor strategies to meet your specific goals.

## AKS ACCELERATOR PHASES

"InCycle's [ARO Enterprise Strategy and Implementation Accelerator](#) is a novel concept. After over a year trying to do it ourselves, it allowed us to implement a state-of-the-art container strategy with ARO --- within weeks! Our teams can now access on-demand and ready-to-use ARO clusters that adhere to our software, quality and security standards".
