

SCALE GITHUB ADVANCED SECURITY (GHAS) WITH MODERN ENGINEERING PRACTICES

Enhance security with GitHub Advanced Security (GHAS) at scale to protect from vulnerabilities — and the liabilities that come with them. Our GHAS experts will guide your organization through every aspect of the process to achieve a tailored implementation fitted to your business goals. Learn about GHAS best practices, optimized configuration, and how to get the most value from information created by the service. As an accredited **GitHub partner**, InCycle can accelerate your organization's adoption while solidifying your security posture.

GitHub Verified Partner

Shift Security Left with GHAS

Code Security Review

Review and analysis of current security policies and goals to ensure targeted implementation and optimal coverage.

GHAS PoCs & Pilots

Champion initial advanced security PoC or pilot to high-impact project or team, enabling initial group to immediately drive impact and success.

GHAS Training

Designed for developers and security specialists, GHAS training enables team members to apply advanced security in their daily workflow.

Implement at Scale

Expand GHAS implementation to enterprise rollout including communication plans, dependencies, and validate adoption.

Enterprise Readiness

Enable developers and other stakeholders to collect code repository data and ensure readiness for code and secret scanning.

Expert Coaching & Support

Post implementation support and office hours for additional knowledge transfer, problem solving and guidance.

"InCycle helped us modernize our DevOps practices and improve code security with GitHub. This eliminated costly and error-prone manual tasks and decreased our vulnerability exposure. Not only did we improve productivity, but we also sleep better!"
